

ERRATUM

Updated diagram “Need for skill improvement – employer view”

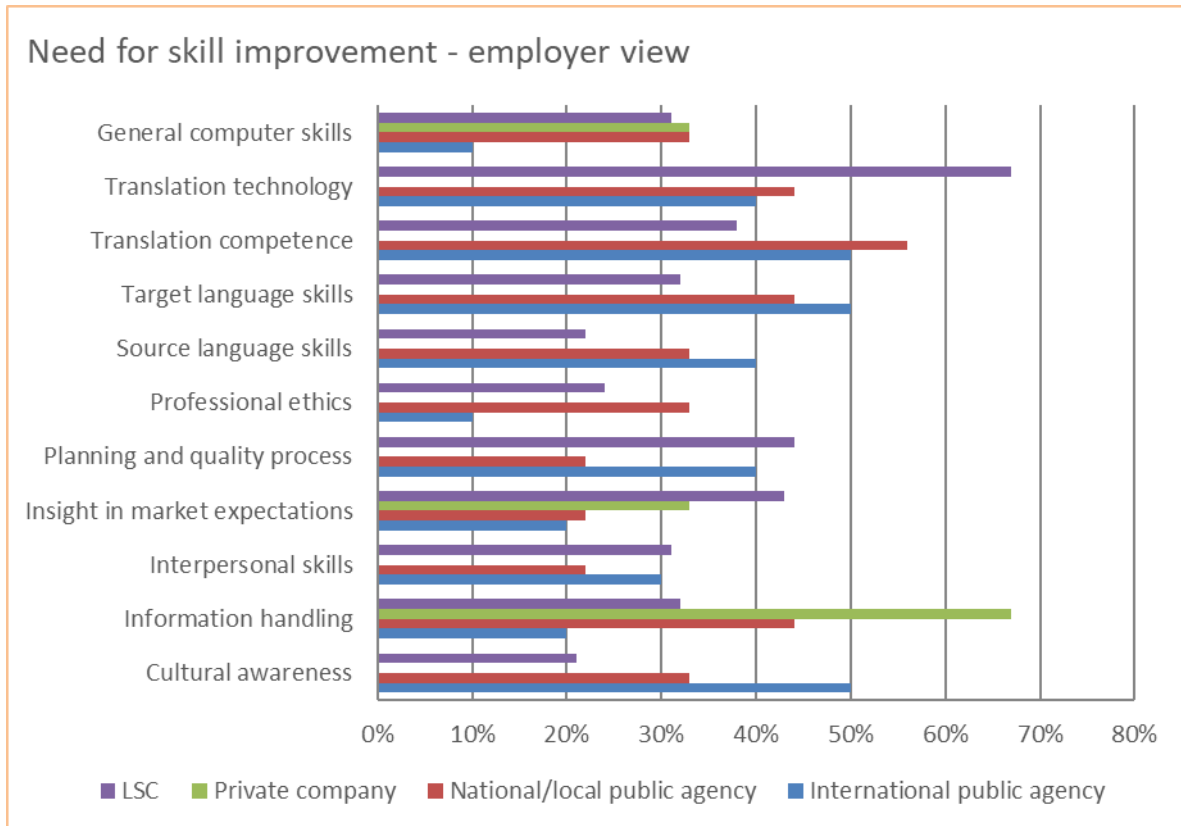

The diagram “Need for skill improvement – employer view” – Fig. 76 in the ELIS 2022 report and slide 36 in the original presentation – does not correctly reflect the full language department dataset.

Below is the correct diagram and the table with its source data.

	Cultural awareness	Information handling	Interpersonal skills	Insight in market expectations	Planning and quality process	Professional ethics	Source language skills	Target language skills	Translation competence	Translation technology	General computer skills	# answers
International public agency	50%	20%	30%	20%	40%	10%	40%	50%	50%	40%	10%	10
National/local public agency	33%	44%	22%	22%	22%	33%	33%	44%	56%	44%	33%	9
Private company	0%	67%	0%	33%	0%	0%	0%	0%	0%	0%	33%	3
LSC	21%	32%	31%	43%	44%	24%	22%	32%	38%	67%	31%	237

Note that the question was only answered by a subset of language department participants. Due to the low number of answers from each organisation type, the results are less reliable than those for the language service companies (LSC).

This correction does not have an impact on the conclusions.
